Lois Ho

lho@berkeley.edu | 626-478-8944 | github.com/loisbho

Education

University of California, Berkeley — Expected Graduation May 2017
Computer Science

Skills

Programming Languages:

- Proficient in: Java, Python, Ruby, SQL
- Familiar with: HTML, CSS, Javascript

Bilingual—fluent in English and Chinese

Work Experience

8/14—present

Department	University of California, Berkeley Instructional and Research Information Systems / Electrical Engineering & Computer Sciences
Job Description	IT Helpdesk System Administrator 1. Troubleshot and diagnosed computer problems and facilitated DHCP connectivity 2. Registered and updated systems in IRIS/EECS domain; performed inventory on software 3. Assisted clients with excellent operational understanding of the technical support structure within EECS

Projects	Description	Important Concepts
Trip Finder (Java)	Used OOP design pattern to implement a graph package to support two clients. Find shortest trip given two locations	√ Implemented directed, undirected graph, BFS, DFS, A*, Dijkstra algorithm, shortest path, and traversal module
2048 (Java)	Implemented OOP to reproduce the widely played game as a Java application	√ Implemented efficient algorithms that considered all possible configurations such as adding and merging tiles
Relational Database Management System (Java)	Effectively implemented a query language of SQL to create a program that had the ability read text-based tables	√ Scanned for user inputs, parsed code √ Displayed tables and exported them into a text file
Ghostbusters (Python)	Designed Pacman agents that used sensors to locate and eat invisible ghosts	√ Implemented algorithms for performing exact and approximate inference using Bayes' nets
Personal Website	www.loisbho.github.io	√ Implemented from scratch HTML, CSS, and Javascript
